

Quantum Horizons: Developments and Opportunities

Summer Research School - Workshop, July 1 - 15 2022 Gebze, TÜRKİYE

Nowadays, the possibility to control and use the states of individual quantum systems is leading to the second quantum revolution, which will offer great advances in quantum computing, simulation, communication and sensing. The School-Workshop will bring together early career researchers and graduate students to present excellent series of specialized lectures, with a broad scope of exciting topics in the domain of quantum science and technology.

Organizers: Hasan Mandal (President of TÜBİTAK), Alikram Nuhbalaoğlu (TÜBİTAK TBAE)

Deadline for Applications: June 20, 2022
